TENNIS, SKIING, GOLF, GRANDCHILDREN. NO MATTER what your passion, heavy use of joints and muscles can cause wear and injury that limit your ability to do what you love. Fortunately, such problems are treatable, and Mount Sinai Orthopaedics Faculty Practice Associates has specialists dedicated to head-to-toe treatment, including all the sore necks, shoulders, elbows, wrists, hands, hips, knees and ankles in between.

All eight doctors pictured—including Dr. Roger N. Levy—are on the *New York Super Doctors* list. Moreover, they are recognized leaders in researching, perfecting and applying

new and less-invasive techniques for treating common “wear and tear” problems such as rotator cuff injuries of the shoulder; tennis elbow; and arthritis of the hips, knees, spine, wrist and hands. There is also special expertise in treating tumors; congenitally related condition and traumatic injuries. Microvascular specialists can also repair nerve injuries and reconstruct major problems.

Mount Sinai Orthopaedics Faculty Practice is recognized as the last-stop destination for some of the toughest orthopaedic problems. It is a great starting place for your good musculoskeletal health to prevent future problems.
